

Empower Your Crypto Journey with Personalized Swiss Expertise

Join an exclusive investment circle where seasoned crypto professionals guide you one-on-one—so you can confidently build, secure, and grow your digital assets.

On Ramp

- **One-on-one service** where an experienced crypto investor remotely connects to a member's computer, guides them through (or directly performs) the steps needed to create an account on a crypto exchange, verify their identity, and complete the purchase of cryptocurrency using their bank account or card—essentially handling all the technical and setup work on the member's behalf.

Onboarding 1/2

Revolut

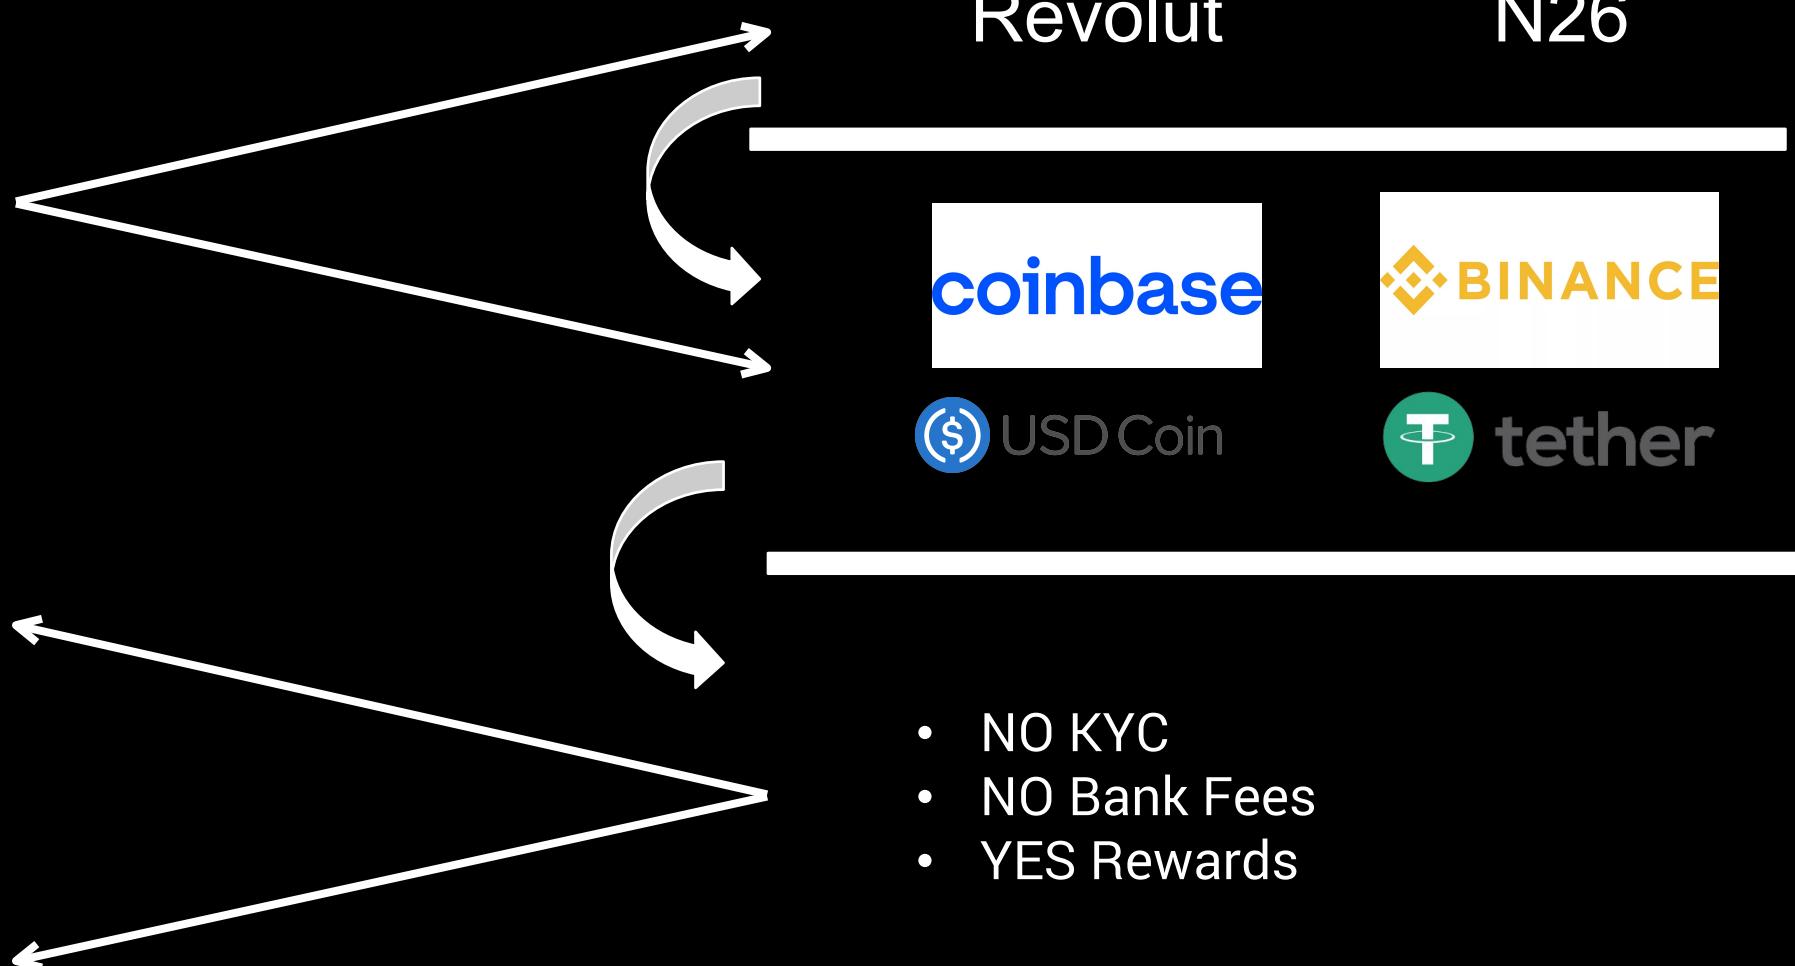

N26

BTC	Bitcoin	XRP	Ripple
ETH	Ethereum	ADA	Cardano
USDT	Tether	DOGE	Dogecoin
BNB	Binance Coin	MATIC	Polygon
USDC	USD Coin	SOL	Solana

Onboarding 2/2

- Account opening
- KYC
- Wire transfer

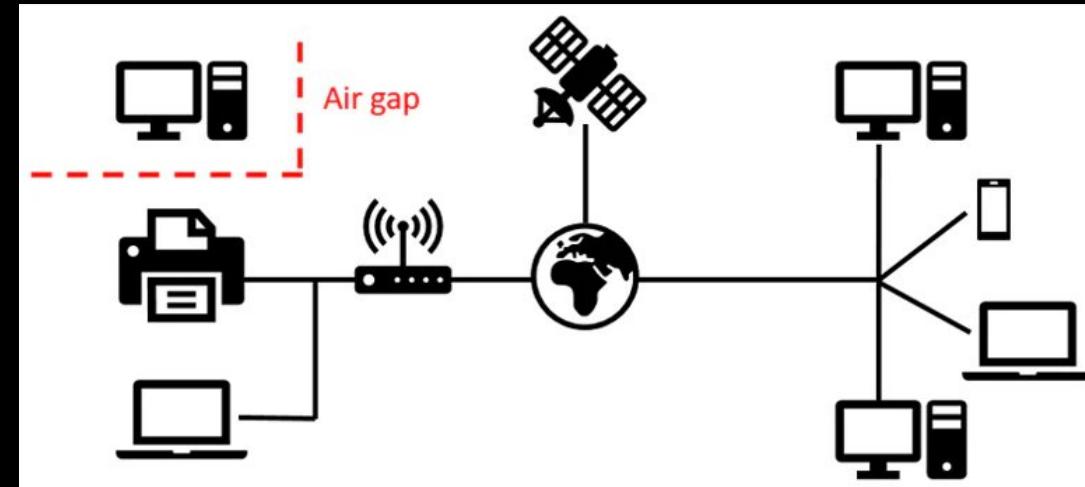

Crypto Custody

- **Non-custody** (like Coinbase or Binance) means the exchange holds your crypto for you—similar to a bank holding your money—so you access it with an account and password, but they technically control the keys.
- **Self-custody** (like using a hardware wallet) means *you* hold the private keys and are solely responsible for storing and protecting your crypto, giving you full control but also full responsibility— if you lose access, there's no one to recover it for you.

Get Started

- A service to guide you step-by-step from the very start—helping you set up an account on a crypto exchange to buy your first Crypto (**on-ramp**), then assisting you in transferring those funds to your own hardware wallet for **self-custody**.
- From there, they can guide you in connecting your wallet to trusted platforms, walk you through **staking** to earn rewards, help you set up funds to **hold**, or even introduce you to more **advanced strategies**.

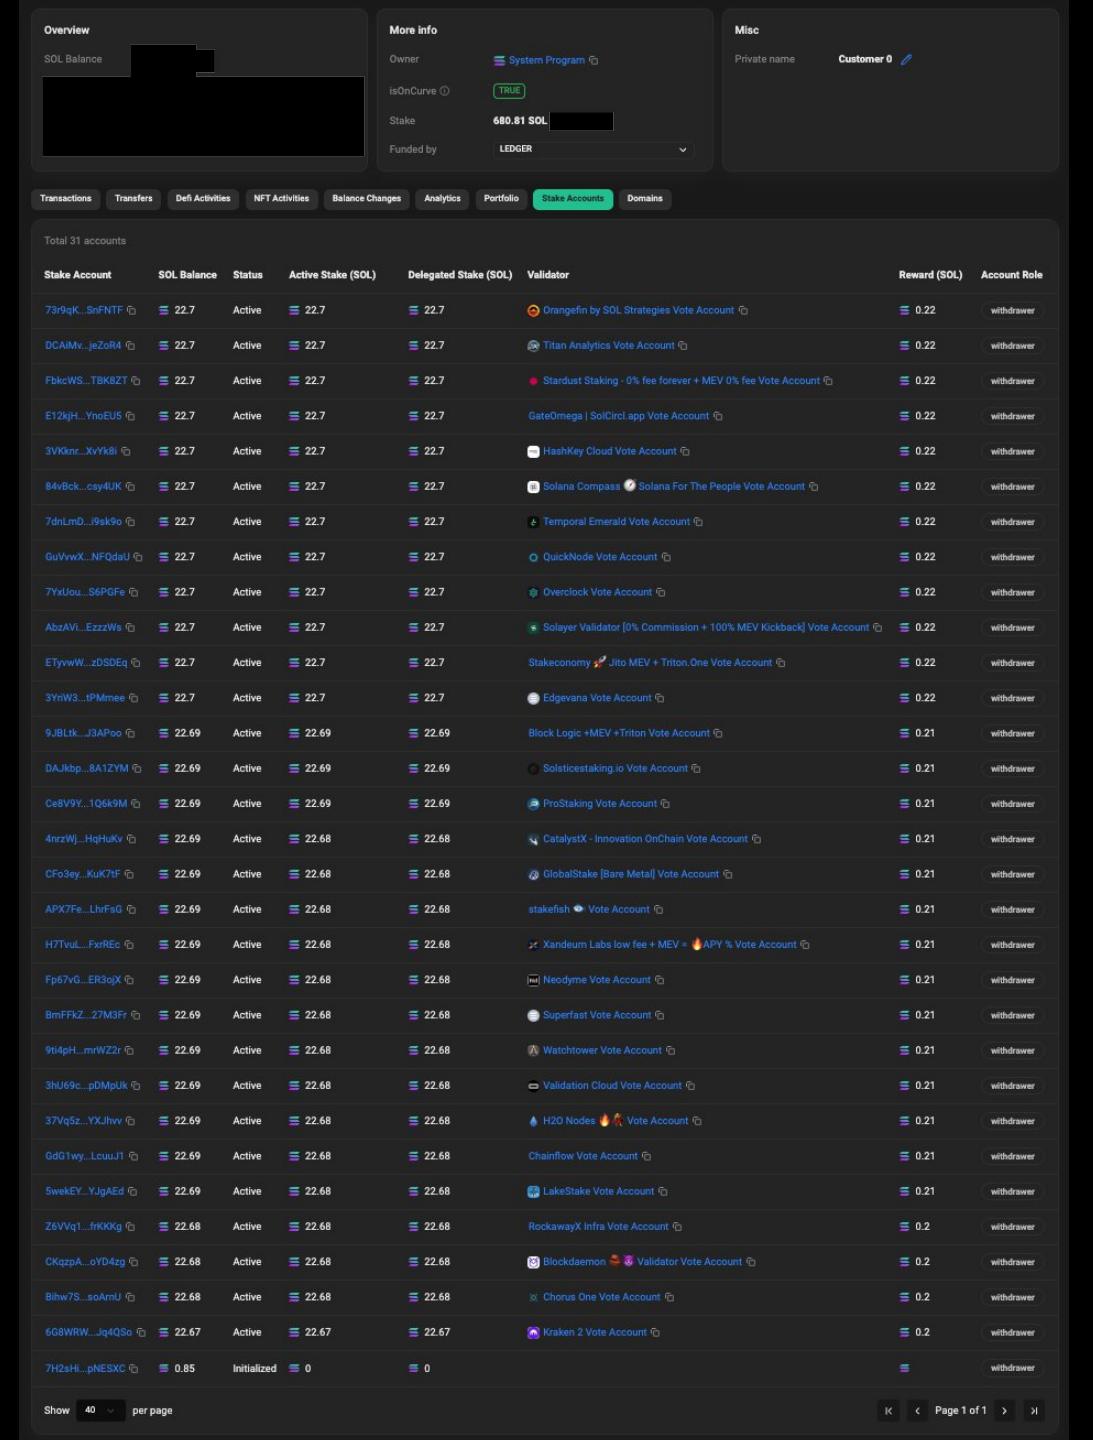

Real example 1/4

1. From Revolut To Binance
2. From Binance To Self Custody
3. Staking Self Custody with Solana

2 months ago	CREATE ACCOUNT	Customer 0	Stake 2	- 324.5	SOL
2 months ago 06-20-2025 10:13:38	TRANSFER	Binance 2	Customer 0	+ 324.491	SOL
2 months ago	CREATE ACCOUNT	Customer 0	Stake 1	- 350	SOL
2 months ago	TRANSFER	Binance 2	Customer 0	+ 348.999	SOL
2 months ago	TRANSFER	Binance 2	Customer 0	+ 0.999	SOL

Real example 2/4

- Automatic Diversification
- Non-custodial delegation system
- Staked
 - 350 SOL
 - 324.5 SOL
- Which was populated across top tier validators (30 to 100)

The screenshot shows a wallet interface with the following sections:

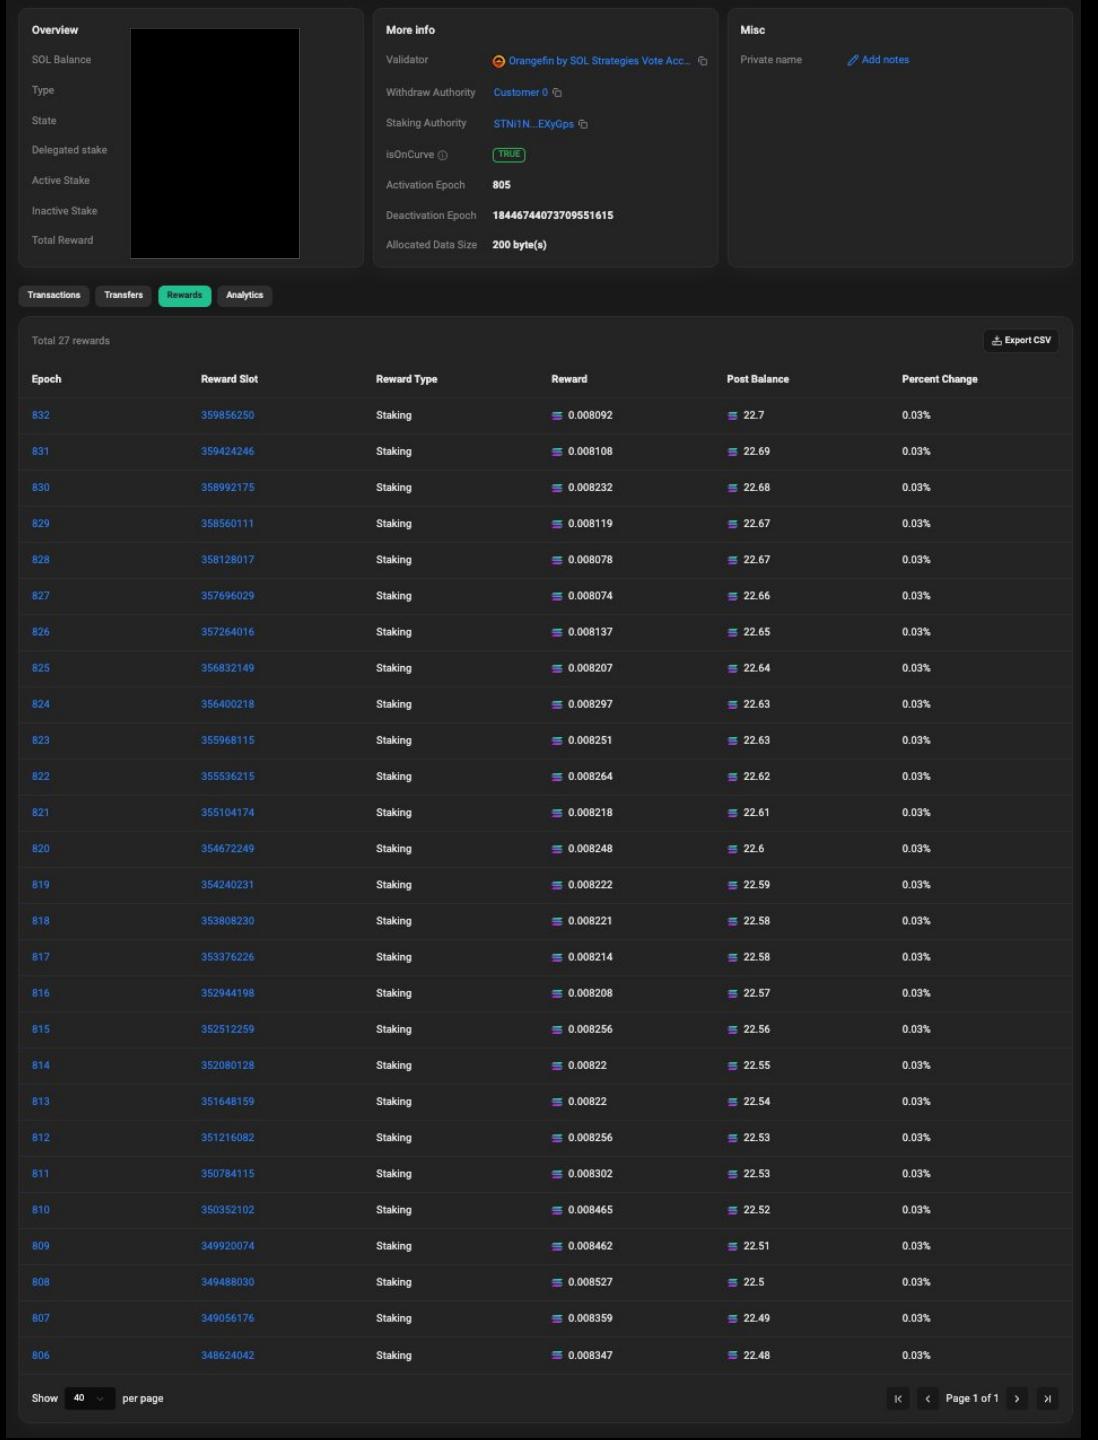

- Overview:** Displays SOL Balance (680.81 SOL), isOnCurve (TRUE), Stake (680.81 SOL), and Funded by (LEDGER).
- More Info:** Shows Owner (System Program), isOnCurve (TRUE), Stake (680.81 SOL), and Funded by (LEDGER).
- Misc:** Shows Private name (Customer 0) and Customer 0.
- Stake Accounts:** A table showing 31 accounts. The columns are: Stake Account, SOL Balance, Status, Active Stake (SOL), Delegated Stake (SOL), Validator, Reward (SOL), and Account Role. The table lists various validators like Orangefin, Titan Analytics, Stardust Staking, GateOmega, HashKey Cloud, Solana Compass, Solana For the People, Temporal Emerald, QuickNode, Overclock, Solayer Validator, Stakeconomy, Edgevana, Block Logic, Solsticestaking, ProStaking, CatalystX, GlobalStake, stakefish, Xandem Labs, Neodime, Superfast, Watchtower, Validation Cloud, H2O Nodes, Chainflow, LakeStake, RockawayX Infra, Blockdaemon, Chorus One, Kraken 2, and Kraken 2.

At the bottom, there are buttons for Show 40 per page and Page 1 of 1.

Real example 3/4

- From Epoch 806
- to Epoch 832
- June 21, 2025 08:19:18 to
- August 11, 2025 23:36:47
- 51 days
 - around 0.03% reward per Epoch

The screenshot shows a Solana staking rewards dashboard with the following sections:

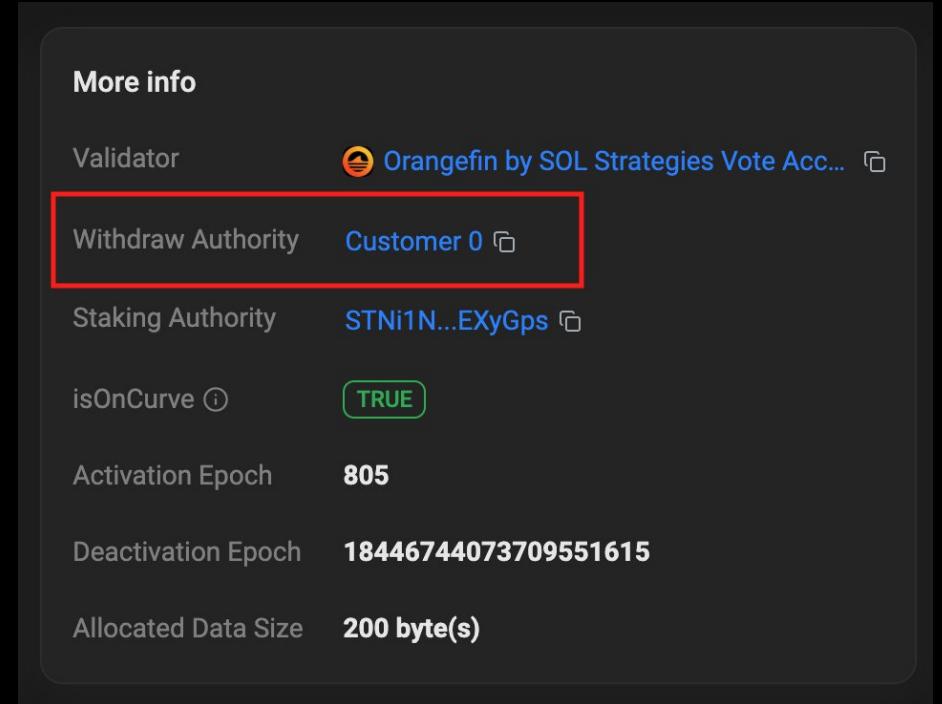

- Overview:** Displays SOL Balance, Type (Staking), State (Active Stake), Delegated stake, Active Stake, Inactive Stake, and Total Reward. The Total Reward is shown as a large black box.
- More Info:** Validator (Orangefin by SOL Strategies Vote Acc...), Withdraw Authority (Customer 0), Staking Authority (STNIN...ExyGps), isOnCurve (TRUE), Activation Epoch (805), Deactivation Epoch (18446744073709551615), and Allocated Data Size (200 byte(s)).
- Misc:** Private name and Add notes buttons.

Below these sections is a table titled "Rewards" with the following columns: Epoch, Reward Slot, Reward Type, Reward, Post Balance, and Percent Change. The table contains 27 rows of data, showing the reward for each epoch from 806 to 832. The "Percent Change" column shows a consistent 0.03% increase for each epoch.

Epoch	Reward Slot	Reward Type	Reward	Post Balance	Percent Change
832	359856250	Staking	0.008092	22.7	0.03%
831	359424246	Staking	0.008108	22.69	0.03%
830	358992175	Staking	0.008232	22.68	0.03%
829	358560111	Staking	0.008119	22.67	0.03%

807	349056176	Staking	0.008359	22.49	0.03%
806	348624042	Staking	0.008347	22.48	0.03%

Real example 4/4

- June 21 - 674.5 (invested at day 00)
- August 11- 681.74 (after 51 days)
- **Annualized yield: ~7.82% per year**
- Self Custodial protocol
 - Only YOU can withdraw

Macro Investment Strategy 1/3

- Invest during local lows (market dips)
- Consider news & events – often the crowd reacts emotionally
- Bet against the public – opportunities are when others panic
- Timeframe: minimum 3 years, ideally 5+ years
- You choose the entry price, stay patient and disciplined

Regular Investment Strategy (DCA)* 2/3

-  Decide on a fixed amount to invest (e.g., 200 USD)
-  Choose a regular interval (e.g., monthly)
-  Invest consistently regardless of market price
-  Accumulate over time and smooth out price fluctuations
-  Stay disciplined – avoid emotional reactions
-  Review yearly and adjust if needed

*Dollar-Cost Averaging

Bitcoin HODL Strategy 3/3

- 💡 HODL = Hold On for Dear Life
- 📈 Bitcoin is volatile short-term, but historically strong long-term
- ⌚ Time horizon: think in years, not weeks
- .Ignore daily price swings & media noise
- 📊 Accumulate gradually (e.g., DCA) and never panic sell

Withdrawals timeframe

- Physical access time :
 - For security reasons, the private key is stored in a separate location
 - following day of withdrawl request
- Native protocol is 1 epoch cooling period (around 2 days)
- Reverse the process (off-ramp)
 - SOL to USDC —> 1 day
 - USDC to USD Revolut / N26 —> 1 open bank day (N26 instant)
- Total around 5 days to your bank account

🚫 Avoiding the \$5 Wrench Attack 1/2

- 🔒 Your crypto cannot be technically hacked, but **you** can be physically attacked
- 🔐 A simple **\$5 wrench** can bypass sophisticated protection
- 🔘 **Do NOT talk** about your crypto investments
- 🔗 **Absolutely avoid mentioning it on social media**

Peace of mind 2/2

- Avoid these so-called "wrench attacks"
- *Whether a street robbery, a burglary, or a kidnap, these offences share a distinct commonality: high levels of violence that are extremely traumatic for the victims to endure.*
- *a situation where physical force or intimidation is used to compel a victim to surrender access to their cryptocurrency holdings.*

Fees 1/3

Custody fees per quarter (all in CHF):

- 20 for 0 - 50'000 assets
- 25 for 50'000.01 - 100'000 assets
- 37.50 from 100'000.01 - 150'000 assets
- 50 > 150'000 assets
- Above 1 million assets, additional 0.0075% per quarter will be added to cover safekeepping fees

Fees 2/3

- No fees for deposits equivalent to CHF 500 or more. CHF 10 flat fee for deposits of lower value.
- Withdrawal to fiat : 100 CHF flat fee
- On ramp : 500 CHF flat fee
- Extra support : 190 CHF / hour
 - Advanced strategies (liquidity pool, portfolio diversification)

Fees 3/3

- Management Fee : 0.25% - 2% per year
- Performance Fee : 10% to 20% (high-water mark)
- Staking fees : 20% of rewards
- Currency conversion : 1%
- All fees are taken directly by the club

🛠 Practical Guidelines

- ⚒ Join a private Investment Club (maximum 20 members)
- 💳 Fiat withdrawals only to the same bank account used for deposits, in the member's name
- ⚖ No liability: the Club is not responsible for losses, errors, or third-party outages
- 🔒 100% Privacy guaranteed regarding all conversations
